NDA Releases 2021 National Policy Agenda

[Washington, DC] – Today, the National Demolition Association (NDA) released their 2021 National Policy Agenda, a comprehensive advocacy agenda for 2021, which outlines policy priorities that will strengthen the demolition industry and stimulate job growth across the U.S. economy.

"With a new Congress and Administration, NDA is optimistic about substantive legislation that will promote economic growth, ensure workforce safety, and further environmental stewardship," said Jeff Lambert, Executive Director of NDA. "This agenda clearly defines the demolition industry's positions and will help policymakers craft workable solutions to balance safety and health with the needs of our members. These are business owners in the community and are actively aiding our country's economic growth. We are ready to work with lawmakers and regulators to ensure economic success for years to come."

The 2021 NDA National Policy Agenda is divided into eight different policy areas:

- Workplace Safety & Health;
- Labor and Human Resources;
- Tax Policy;
- Environmental Stewardship;
- Healthcare;
- Disaster Response;
- Procurement Transparency & Fairness;
- Trade; and
- Infrastructure
