[Washington, D.C.] – The National Demolition Association (NDA) today announced the release of a new document, Considerations for Demolition of Power Plants. The document was developed in collaboration with the Occupational Safety and Health Administration (OSHA) through the NDA Alliance Program, which provides NDA members and the public with access to compliance assistance resources.

“Over the next ten years and with the passage of the Infrastructure Investment and Jobs Act in 2021, we see an increased demand for demolition and remediation services as by some estimates we see over 400 units coming offline in the next ten years,” said James Milburn, President at NDA. “Through the work of our committees, volunteers, and stakeholders, and our OSHA partnership as part of the Alliance Program, we focused on safety and demolition industry best practices to assist stakeholders in these projects.”

The NDA Alliance Program focuses on developing best practices in demolition safety. These documents and projects related to the Alliance are housed on the NDA website for use by industry practitioners and stakeholders.

To download the new guidelines, please visit the NDA website at <https://www.demolitionassociation.com/Advocacy/OSHA-Alliance>.

### About the National Demolition Association

The National Demolition Association (NDA) is a nonprofit trade organization representing approximately 500 U.S. and Canadian companies and many international firms that are involved in the demolition process. NDA is the voice of the demolition industry in Washington and throughout the nation. NDA’s primary mission is advocacy and education to strengthen the business environment of the demolition industry. Membership includes demolition contractors, general contractors and civil engineers abreast of environmental, regulatory and safety matters. Visit [www.demolitionassociation.com](http://www.demolitionassociation.com) to learn more about NDA’s offerings.
